Excerpt: .from a given portion of the sample with that produced by a definite quantity of a standard solution of arsenic. Bird 2 made a careful study of the conditions under which the arsenical stain on mercuric chloride paper may be best obtained and identified, with especial reference to the interference of the hydrides of sulphur, phosphorus, and antimony. Although his work is extremely suggestive of a quantitative application, he himself considers that the test is only approximately quantitative, in that the stain obtained from a given amount of substance, say beer, may be shown to be greater or less than the stain representing a fixed limit of arsenic for that amount. He also regards it as a true negative test. Treadwell and Comment3 compared the stain obtained from the action of arsine on argentic nitrate paper with a series of stains from definite quantities...
