Neuware - Scientific Study from the year 2006 in the subject Business economics - Personnel and Organisation, grade: 2,0, Maastricht University (Faculty of Economics and Business Administration, Studiengang International Business), language: English, abstract: Inhaltsangabe:Abstract: Burnout is a multidimensional psychological syndrome that evolves as a reaction to chronic stress in the workplace. It results in an irrevocable depletion of a person's energies and emotional resources with various negative consequences for individuals and organizations. In the past 30 years researchers tried to understand the burnout construct in its complexity and offered diverse answers to questions of why burnout appears and how it can be measured. But despite the broad academic research on burnout, the knowledge base is still lacking a comprehensive approach on how to prevent burnout from happening and how to alleviate organizations from its negative implications. For that reason it is inevitable for managers to comprehend the burnout phenomenon in its multidimensional and holistic whole. Accordingly, chapter two will explicate the theoretical burnout construct to a managerial audience. A summary of the historical and empirical research activities will be given in section 2.1 in order to provide a better understanding of how the knowledge base on burnout evolved over time to its...
