Are the Distinctions Between the Past Present and Future Illusions as claimed by Einstein? Is it possible to travel into the future through the power of mind? Memory enables us to travel into the past, but mental time travel allows one to visit a future; a future which may already exist as predicted by Einstein's field equations: time may be a circle leading from the present to the future and then the past. Relativity also predicts that the only way to travel to the past is to first travel to the future, at which point one contracts to a size smaller than a Planck length and in so doing blowing a hole through the fabric of the space-time continuum and which may lead to a mirror universe if one dares to cross over the Einstein-Rosen bridge--and similar bridges are predicted to lead to other universes upon entering and surviving a journey through a black hole. Quantum mechanics also predicts time reversal in spaces smaller than a Planck length. Although the branch of...
