Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from A Biometric Study of Basal, Metabolism in Man In carrying out the work underlying this volume we have attempted to do more than to treat the available data for the basal metabolism of normal men, women and children by a method which is practically new in its application to human physiology; we have endeavored to make this investigation a prototype of that specialization in methods and cooperation in problems which we believe will be characteristic of the best scientific work of the future. We are convinced that this cooperation of specialists of widely dissimilar training is the only means by which science can attain both the height of refinement of measurement and analysis and the breadth of comparison and interpretation which is essential to continued progress. The measurements considered in this volume have been made possible by the painstaking cooperation of a score or more fellow workers, all of whom are connected or have been associated with the Nutrition Laboratory. How large their contribution has been will be evident from the names of the observers...
