Dodo Press, United Kingdom, 2009. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.William Withering (1741-1799) was an English botanist, geologist, chemist, physician and the discoverer of digitalis. In 1776, he published *The Botanical Arrangement of all the Vegetables Naturally Growing in Great Britain*, an early and influential British Flora. It was the first in English based on the then new Linnaean taxonomy - a classification of all living things - devised by the eminent Swedish botanist and physician Carolus Linnaeus (1707- 1778). In 1785 he was elected a Fellow of the very prestigious Royal Society and also published his *An Account of the Foxglove and Some of its Medical Uses, With Practical Remarks on Dropsy and Other Diseases*. In 1787 he was elected a Fellow of the Linnaean Society in recognition of his contribution to botany. Subsequently the plant *Witheringia solanacea* was named in his honour, and he became known on the continent of Europe as *The English Linnaeus*. He also conducted a series of experiments on *Terra Ponderosa*, a heavy ore from Cumberland, England. It was later shown to be barium carbonate and in 1789 the eminent German geologist Abraham Gottlob Werner named the mineral *Witherite* in his honour.
